turn lever *10* (Fig. 29) towards rod *8* and remove nut *11* from the lever;

by screwing nut *11* on or off draw rod *8* ensure that the clearance between nut *11* and pin *9* of the lever is within 0.5—1 mm. The threaded part of the draw rod must not be sunk in the nut; if necessary, release the check nut of the forked end piece and set the requi-
